## PROFILE

Python engineer focused on Generative AI: LLM applications, RAG pipelines and agentic workflows taken from prototype to production. Sole developer of an enterprise AI platform running on Google Cloud at co.brick, in parallel with RAG research at the Polish Academy of Sciences. Author of 3 peer-reviewed workshop papers in 2026 at ACM CIKM and ECML PKDD. Day-to-day work with LangChain, LangGraph, Google ADK, MCP, vector databases and AI-assisted development tools.

## EXPERIENCE

### Junior AI Python Developer
01.2026 – Present

*co.brick*

- Sole developer of an internal AI recruitment platform that helps the HR team search, assess and contact candidates. The system keeps candidate data in sync with the company CRM and is used daily in production.
- Responsible for the whole application: data pipeline, AI layer, user interfaces and cloud infrastructure, from first design decisions to production releases.
- Build RAG pipelines that turn unstructured documents into structured, searchable knowledge: document parsing, chunking, embeddings, vector search and LLM-based extraction.
- Develop multi-tool AI agents (LangGraph, Google ADK) integrated with corporate databases, REST APIs and enterprise systems, delivered as a web application and a Slack assistant.
- Evaluate and improve model output: prompt iteration, scoring pipelines, tracing and monitoring of agent runs with Langfuse, and guardrails against unreliable answers.
- Own deployment and reliability on Google Cloud: FastAPI services, Docker, Kubernetes (GKE), Helm and GitHub Actions CI/CD, with scheduled jobs and automated business workflows.
- Work with AI-assisted development tools (Claude Code, GitHub Copilot) as a standard part of daily delivery.

**Stack:** Python, FastAPI, Streamlit, LangChain, LangGraph, Google ADK, Gemini, Qdrant, PostgreSQL, LlamaParse, Gmail API, Slack SDK, Docker, Kubernetes (GKE), Helm, GitHub Actions, Langfuse

### Junior Researcher
06.2025 – Present

*Institute of Theoretical and Applied Informatics, Polish Academy of Sciences (IITiS PAN)*

- Research on information retrieval and RAG optimisation: chunking strategies, embedding and retrieval hyperparameters, pipeline evaluation.
- Co-developed ProHES, a framework for analytical selection of RAG hyperparameters.
- Co-developed T-MATE, a multi-modal anomaly and cyber-threat detector for cloud services.
- Built an LLM-guided agentic toolbox for compressing neural networks for edge deployment.

### Freelance AI & ML Developer
07.2025 – Present

*Self-employed*

- Build AI agents and automation systems in Python with LangChain, LangGraph and LLM APIs for individual clients.
- Delivered an AI-powered Google Drive assistant with a full RAG pipeline over Drive contents and Qdrant-backed semantic search.

## PUBLICATIONS

**Gibała R.**, Nakıp M. *An LLM-Guided Agentic Optimization Toolbox for Edge-Deployable Neural Networks.* GREEN-AI Workshop at **ACM CIKM 2026**, Rome.
LLM agent that automatically compresses neural networks for edge devices under user-defined accuracy and memory constraints.

Nakıp M., **Gibała R.**, Nowak S. *Proactive Hyperparameter Estimation & Selection Framework for Information Retrieval in LLMs.* SHIELD-AI Workshop at **ECML PKDD 2026**, Naples.
Analytical framework that selects the similarity metric and number of retrieved documents for RAG without exhaustive search.

Nakıp M., **Gibała R.**, Grygar A., Nowak S. *Trend-based Multi-Modal Anomaly and Cyber Threat Detection with Traceable Explainability for Cloud Services.* SOMI-2026 Workshop at **ECML PKDD 2026**, Naples.
Explainable detector of anomalies and cyber threats in cloud services, combining telemetry forecasting with LLM-based log analysis.

## TECHNICAL SKILLS

**Languages**
Python, SQL

**GenAI & Agents**
LangChain, LangGraph, Google ADK, MCP, RAG, prompt engineering, LLM evaluation

**LLM APIs & Models**
Gemini API, OpenAI API, Hugging Face, Ollama, LLaMA, Gemma, TensorFlow

**Vector & Databases**
Qdrant, FAISS, PostgreSQL, embeddings, chunking strategies

**Backend & UI**
FastAPI, Streamlit, REST APIs

**Cloud & LLMOps**
Google Cloud (GKE), Docker, Helm, GitHub Actions, CI/CD, Git, Langfuse tracing

**AI Dev Tools**
Claude Code, GitHub Copilot

**Data**
Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

## EDUCATION

**Silesian University of Technology**
Faculty of Applied Mathematics
Computer Science, practical profile
10.2022 – Present

**Engineering thesis:** Android application using AI for health problem recognition

## LANGUAGES

| | |
|---|---|
| Polish | Native |
| English | B2+ |

## SOFT SKILLS

Analytical thinking and problem solving · Teamwork and communication · Adaptability and self-motivation · Continuous learning

## INTERESTS

AI research: RAG optimisation and edge AI · Judo · Running

I hereby give consent for my personal data included in my application to be processed for the purposes of the recruitment process under the European Parliament's and Council of the European Union Regulation on the Protection of Natural Persons as of 27 April 2016, with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (GDPR).
